Dan,

Since we have not received the site-specific EPA action levels for radiological parameters for the CRU site, we have not been able to complete and provide you with a Removal Assessment Report for the last two events conducted by RST 3 at the site. However, the attached draft document is a summary of the site history including all the recent events conducted by EPA with the support of RST 3 in 2015.

If you have any questions, comments or addition to this narrative please let me know.

Thanks.
